

The diagram illustrates the flow of traffic and pedestrian movement in a building layout. It is divided into two main sections: a top section representing a road or highway and a bottom section representing a building floor plan.

Top Section (Road/Highway):

- A dark blue horizontal bar represents the road surface, with white vertical lines indicating lane markings.
- Red arrows indicate the flow of traffic from left to right.
- A red arrow labeled 'X' with a curved arrow indicates a turning movement (likely a right turn) from the road into the building area.
- A large black 'X' is positioned at the top right corner of the road section.

Bottom Section (Building Floor Plan):

- The building layout is shown with blue outlines for walls and rooms.
- Black arrows indicate the flow of pedestrian movement:
 - Downward arrows on the left side of the building.
 - Upward arrows on the right side of the building.
 - Rightward arrows along the bottom edge of the building.
- A specific area is labeled "Playground" within a dashed blue outline.
- Orange dots are scattered in the bottom right corner, near the playground area, possibly representing people or objects.
